

City Basements Limited recognise that within the construction industry the need to understand and minimise environmental impact is crucial.

Where ever possible environmental considerations are given equal importance to the more traditional business issues such as safety, productivity, research, sales, and finance.

In all our activities, working practices and business relationships the Company is working towards achieving its environmental objectives by,

- Meeting or exceeding relevant environmental legislation
- Setting and monitoring environmental objectives and targets
- Educating staff and resources to ensuring that the objectives are met
- Minimising the impact of all its operations on the local and global environment and the quality of life of the local communities in which the Company operates
- Maintaining the cleanliness and appearance of premises to the highest practical standards
- Aiming for efficient use of all resources used in its operations and by reduction of waste through process improvements and recycling
- Reduce or eliminate pollution
- Recycling of material is continued wherever feasible and further positive steps are taken to conserve resources, particularly those that are scarce or non-renewable
- Fully considering, in advance where possible, the environmental effects of any significant new development and adjust the Company's plans accordingly
- Providing customers with the information necessary to enable our products to be properly used, stored and disposed of so as to avoid unacceptable effects on the environment
- Working with suppliers to ensure that the products and the services they supply are environmentally acceptable
- Providing the necessary information to enable Employees to operate the processes properly and with minimal effects on the environment
- Expect and insist on similar environmental standards to our own from all third parties involved with our business – suppliers, vendors and contractors.
